Briquettes

A briquette is basically a compressed block of agro-waste and biomass waste that is used as a substitute of non renewable resources of fuel like coal, petrol, etc. The briquette is made from agricultural waste, forestry waste, stalks, wood waste like saw dust, etc. This raw material is passed under various processes to form the final proper shaped briquette. The process consists of crushing, compressing and drying the final end product to increase their life span and efficiency.

Briquette Plant

JAY KHODIYAR
MACHINE TOOLS
Converting Agro waste Into Gold
Since 1994

The briquetting plant is used to prepare the briquettes at high speed and having uniform shape and size. The **briquetting plant** varies in the features and the shape and size of the briquette that they prepare. They also vary in the production capacity depending on the material from which the briquette is to be prepared.

The process of briquetting is comparatively cheaper than other fuel production process. We offer a wide range of briquetting plant and briquetting machine at the most competitive price range compared to any other dealer in the market. The price of each machine and plant depends on the model you select and the modification that are requested in it.

Briquetting Systems

JAY KHODIYAR
MACHINE TOOLS
Converting Agro waste Into Gold
Since 1994

The complete briquetting system consists of all the machines that are required for preparing the briquette. The briquetting system has a crusher, dryer and the briquette press machine to make the briquette of proper shape and size at high speed. The production capacity of system varies from each model to model and raw material that is used in it.

Biomass Briquetting

Since 1994

The biomass briquetting system is useful in making biomass briquettes. The biomass briquette consists of bio-waste, green waste and other organic waste. They are used as a substitute of various non renewable resources of fuel like coal, charcoal, petrol, etc. The biomass briquetting machine is used to prepare uniform shaped briquettes at high speed.
